**RE: PhD position at the University of Toronto and Post-doctoral fellowship,
Sunnybrook Research Institute**

One doctoral (Ph.D.) student and one Postdoctoral Fellow position each are immediately available at the University of Toronto and Sunnybrook Research Institute to investigate SARS-CoV-2 pathogenesis and transmission.

Requirements: Candidates should be highly motivated, enthusiastic, ambitious and have strong interest in virology and viral pathogenesis. Prior experience in virology and molecular biology are required for this project; containment level 3 and animal model experience are an advantage. Postdoctoral candidates should have a recent Doctoral Degree (or soon to graduate) in the areas of virology or host-virus response and have published recent first author papers.

For Ph.D. students, stipend and tuition support will be provided as per guidelines for the Department of Laboratory Medicine and Pathobiology at the University of Toronto. For Postdoctoral Fellows, salary follows Sunnybrook Research Institute guidelines.

Interested applicants should submit a single PDF file consisting of a CV, a letter of interest with description of their research experience and career goals, and names and contact information of three referees to Dr. Samira Mubareka (samira.mubareka@sunnybrook.ca) with subject title “Application for Postdoctoral Position” or “Application for Ph.D. Position”.

Thank you for considering.

Samira Mubareka, MD, FRCPC
